ICY BOX HDD Network Multi-Media Player IB-MP3011

## Is 99.00 Euro\* a Good Price? Or is it a Very Good Price?

As the features of the IB-MP3011 are alike to those of products which cost 110, 140 or even 150 Euro 99 Euro is surely a outstanding price.

The new ICY BOX multi-media player IB-MP3011 is based on the chipset Realtek 1073 which is notoriously quite capable: Full HD, DTS and Dolby Digital, WMA and AAC downmixes, all common containers and formats are supported. The differences which make a difference are found somewhere else.

### 1. Dolby Digital True HD

As the chipset is the latest version, Realtek 1073 DD(C+), even downmixes of Dolby Digital (7.1) true HD are possible. Great news for movie enthusiasts.

### 2. Without a Fan

Even when the IB-MP3011 is used with a 3.5" SATA HDD inserted no fan is necessary for cooling. It could be noisily annoying particularly in the most suspenseful or delicate moments. The solid aluminium enclosure and the sophisticated architecture of the interior grant optimum heat dissipation. External hint: the cool look of the IB-MP3011 in its matte black metal case.

### 3. A Little Network Server

With the facility of an HDD to be inserted some goodies come. A Samba and a DLNA server for data access as well as a BitTorrent® client for downloads. Thus this media player is almost a NAS, almost. We don't want to exaggerate.

### 4. Plus ...

Please see the specs.

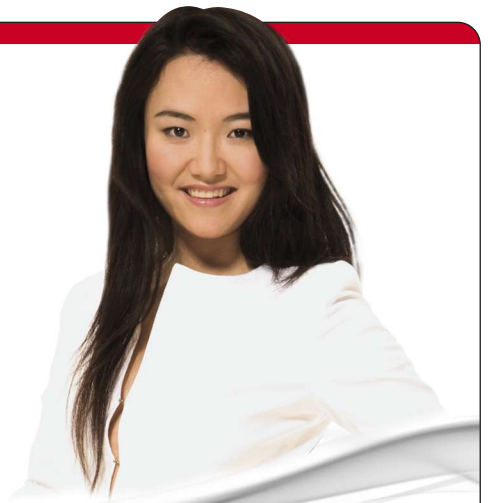

We think in a densely packed product environment where it's hard to spot differences in performance it will be the price which will distinguish the ICY BOX IB-MP3011.

\*recommended retail price
