*New: Powerline Adapters by ICY BOX – IB-PL200/250/500/550*

## High-Speed network straight from the socket – Plug in, Set, Go!

Wherever no additional network cable should be laid – as a subsequent cable installation would come along with large construction efforts – or thick walls and multiple floors make a WLAN impossible/ unstable, the new SUPERmini powerline adapters from ICY BOX are an excellent option.

Expand the network within a maximum range of 300 meters stable and comfortable on the power grid and thanks to the practical, pass-through outlet (IB-PL250/550) no slot for another device is lost. Even with plugged in "power guzzlers" such as a dryer or water heater the built-in electrical noise filter ensures consistently high performance and signal strength of the adapter.

*Network without barriers via Powerline*

**User-friendly installation – easy as child's play**

The installation is very easy – just plug the adapters into the power outlet, connect one adapter to the network, done! The network will be built within a few seconds via the households power supply. Thanks to the driver-less (plug & play) installation it is ready to use immediately and can be expanded up to 8 (IB-PL500/550) or even 64 (IB-PL200/250) Powerline adapters.

**Compatible and eco-friendly**

The ICY BOX adapters are naturally compatible with all popular 200/500 Mbit/s adapters of other brands and are extremely energy-efficient, since they consume in operation not more than 4 watts and in standby mode even consistently less than 1 watt.

**Jerk-free and guaranteed uninterrupted**

Thanks to the fast connection with up to 200 resp. 500 Mbit/s bandwidth\* current computer games in multiplayer mode can be played as well as multimedia content such as HD movies will be streamed easily over the Powerline network. The Quality of Service function (QoS) controls the data traffic and the available bandwidth will be allocated depending on the requirements and prioritized so that the preferred application is always available in the highest quality.

**Safety ex works – even for the little ones**

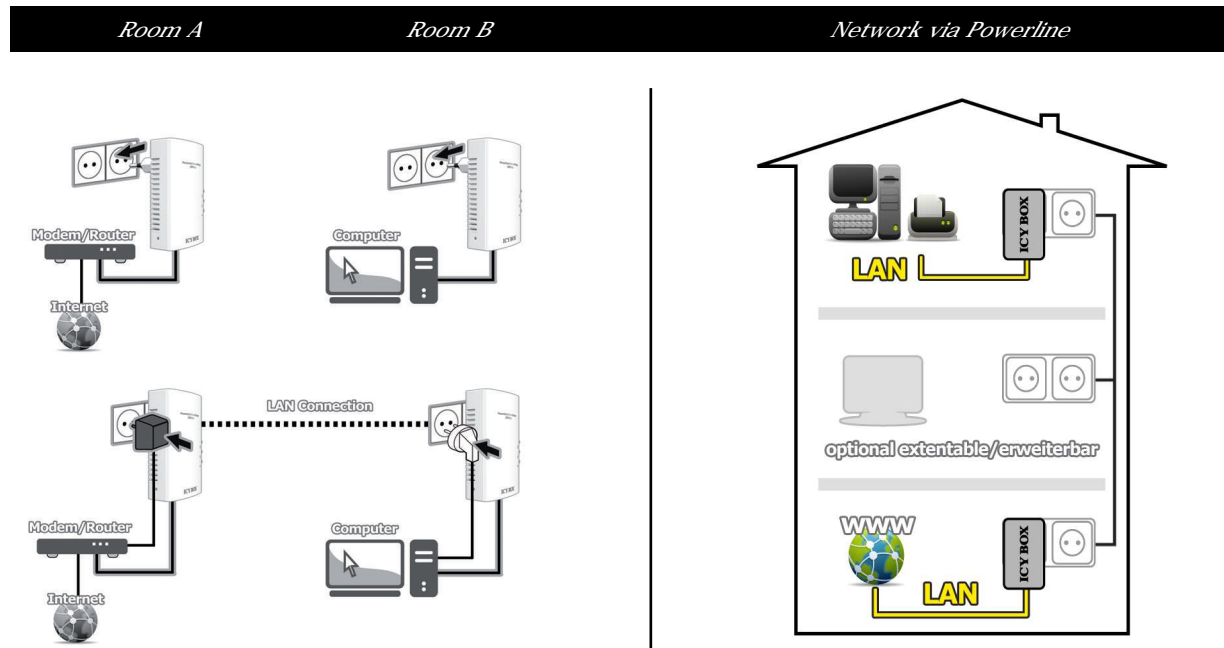

The integrated power socket is naturally equipped with a child-proof lock, so that an electric shock is prevented even if it is not used. Ensuring that all sensitive data in the network are really safe, all ICY BOX adapters already come with a pre-set and extremely secure 128-bit AES encryption.

## Application example:

### ICY BOX Powerline Models

The Powerline adapters IB-PL200, PL250-IB and the IB-PL500 are available now at extremely low introductory prices as starter kits (consists of two adapters) as well as single items, the IB-PL550 follows at the end of February.

IB-PL200	MSRP:	35,00 Euro
IB-PL200D (set)	MSRP:	59,00 Euro
IB-PL250	MSRP:	39,00 Euro
IB-PL250D (set)	MSRP:	74,00 Euro
IB-PL500	MSRP:	46,00 Euro
IB-PL500D (set)	MSRP:	89,00 Euro
IB-PL550	MSRP:	59,00 Euro
IB-PL550D (set)	MSRP:	109,00 Euro
