ICY BOX: The Appropriate Frame For the iPhone 4S, Too

Buying a new iPhone 4S brings fun. Just as enjoyable is that most* of the aluminium protection frames by ICY BOX are in line with the ports of the new iPhone 4S. So nobody who wants to protect or individualize her iPhone with a stylish and solid aluminium frame has to wait .

At all ports the apertures are wide enough for the original Apple plugs. The sometimes somewhat bulky plugs of other manufacturers might be too large.

Why do these aluminum frames look so great? Why do they feel so strong? Design, the tight fit, is the first answer. The second one is: material and workmanship. As the aluminium is to protect it is strong, not only great-looking. And it is anodized, not just painted. First, this contributes to the great look. Second, the subtle apertures for the plugs and the screws can't be narrowed by excess paint.

***These are in line with the iPhone 4S**

IB-i042 in black or silver – RRP Euro 54.90

IB-i043 – RRP Euro 54.90

IB-i044 – RRP Euro 39.90
