Press release RaidSonic 06.3C/2010

## RAIDON

New: Raidon GT1640-1S-SB3 with USB 3.0 and eSATA

### The USB 3.0 Enclosure that is even fast where there no USB 3.0 is around

An external enclosure with a single HDD is nice to be taken to friends or clients. But what becomes of the great, fast transfer speed if the friends or clients don't have a computer capable of USB 3.0\*?

The new external enclosure GT1640-1S-SB3 by Raidon is the solution to this problem. It has USB 3.0 and eSATA. The GT1640-1S-SB3 is the first HDD enclosure with these two interfaces. That makes it the ideal device for multimedia data as there usually large data have to be transferred very fast.

GT1640-1S-SB3 is for one 3.5" SATA HDD, up to 2 TB. Plug&Play, removable HDD tray for very quick HDD changes. Aluminium and plastic.

\*those are either computers with a USB 3.0 controller on the motherboard or the use of a PCI-e-card with USB 3.0 is effective

Recommended retail price incl. VAT Euro 79.00
