IB-390StUS-B and IB-390StUSD-B! ICY BOX complements its portfolio around a further product combination for 3.5" SATA HDDs.

With the new IB-390 series ICY BOX continues its concept of the combined internal/externally solutions.

The IB-390 is available with docking station (IB-390StUSD-B) or without (IB-390StUS-B). The fan less aluminium carrier provides an optimal working environment to the most 3.5" SATA HDDs.

The HDD enclosure can be inserted in the stationary PC by using the docking station, but also be connected via USB 2.0 or eSATA interface directly. Therefore, the enclosure finds a comfortable place inside the computer and can also be used away from home without a docking station.
