- Supports resolution up to 1920x1080
- Micro USB port to connect the mobile device's power supply
- Provides charging function for the mobile device
- Plug & Play

Packing content
1x IB-AC519

High Quality Video Output

The IB-AC519 SlimPort® to HDMI® Adapter can output video signals directly from the SlimPort® enabled mobile device, such as mobile phones or Tablet PCs, to a HDMI® embedded display like your TV. With the micro USB charging function, the adapter allows the device to transmit signals and to charge simultaneously. Low power consumption and high resolution video output make your visual experience better than ever.

ICY BOX IB-AC519 SlimPort® to HDMI® Adapter

Convert your Slimport® to HDMI®

This SlimPort® (Input) to HDMI® (Output) adapter is passing video signals from a mobile device (smart-phone, tablet, ...) to an HDMI® display such as a TV or projector.

More than just a connection

The adapter provides a way to charge your mobile device with the charger of your mobile devices connected via micro-USB. So the battery is no longer drained by the action on your device.

Simple operation

The IB-AC519 doesn't need any additional drivers, so it works on the principle plug & play, just plug it in and off you go. However, the device from which the screen is to be mirrored must support the SlimPort® specification. A list of supported devices can be found here:

<http://www.slimportconnect.com/slimport-supported-devices/>.
