Fit for the future

With this hub, the fast USB 3.0 can be connected to the new Type-C™ port fourfold. The hub is bus-powered, so it can be used without a power supply and is the ideal extension when you want to stay mobile. With a transfer rate of up to 5 Gbit/s, USB 3.0 has many applications. It is downward compatible, so it is also suitable for USB 2.0 devices (with the corresponding lower transfer rate).
